

## AI is already transforming financial management – here's how you can benefit

[Watch now](#)

Hi [Name]

The role of the financial leader is changing, and fast. It can be both daunting and exciting, with real challenges coupled with endless opportunities.

### Meet your finance team's biggest challenges head-on

Sage Intacct is a scalable, native cloud platform designed to streamline finance through automation. Gain real-time access to accurate data and insights, enabling fast, informed decisions that drive success.

### Discover best-in-class financial management

When you move to Sage Intacct, you get more time and bandwidth to devote to your business' growth strategy with core financial functionality and features that include:

AI-powered accounting

Multi-dimensional reports and dashboards

Intuitive budgeting and forecasting

And as it's based in the cloud - you never lose any uptime on upgrades and testing.

Find out more about the benefits that AI and automation are already providing for finance leaders with Sage Intacct. From automating low-value processes to freeing up your finance team to work on strategic, value-added work.
